

or they are suppliers and I will try to name them. The Natural Resource Districts are doing it. Other political subdivisions, such as, Rural Water Districts, and Metropolitan Utility Districts, and Sanitary Improvement Districts, they, too, would have to get a permit. Number nine, it increases the penalty for violation, this is what Senator Schmit was talking about, it provides for a penalty when any operator or any user of water is concerned, it provides for a penalty if they are in violation of the statutes. And the last one, number ten, it will modify the provisions relating to well spacing and check valve requirements. Presently the law says that a pump placed in a well and it is using pesticides or herbicides, they need to install in the pump a check valve so that if the system ceases to operate and there is a chemical in the lines such as a center pivot, when the pump stops it will not allow this mixture to go back into the groundwater area and the change that is made here it just provides for a check valve any place on the system rather than on a certain place but one has to be there. This, Mr. Chairman, is a brief review only, a brief review of the ten major provisions of the committee amendments.

SPEAKER MARVEL: I would propose tomorrow after about an hour of Final Reading and a few motions to return bills that we proceed with an extension of the remarks that Senator Kremer has made so that everybody understands what they are voting on, and then after we finish the water bill, why I will just alert you as to what the schedule is so you can...we will move to 824, which is the community college bill, and then we will go to a revenue bill, 608, and another revenue bill, 609, and then two bills that have the sunset provision unless we do something, 820 and 939 and then we will go to Select File. So we have a full morning, full day tomorrow. I appreciate your patience today and I hope that we can proceed tomorrow, and by Wednesday when we adjourn for the rest of the week that we can see the light at the end of the tunnel. So, Senator Kelly, would you like to adjourn us until nine o'clock tomorrow morning?

SENATOR KELLY: (Mike off) Mr. President, I move we adjourn until nine o'clock Tuesday morning.

SPEAKER MARVEL: All in favor of that motion say aye, opposed no. Motion is carried. We are adjourned until nine o'clock tomorrow morning.
